Join thousands of physicians and other medical professionals who use .md for their email and web address. Register a .md domain name or protect an existing .com name with a .md extension. Thousands of distinctive and sought after .md domain names are available.

The Healthcare Domain

HIPAA-Enabled MaxMail

MaxMail™—a Web-based email application designed to help physicians and other medical professionals achieve HIPAA security and privacy requirements when managing electronic patient information.

- **1 gigabyte of e-mail storage**
- **Complete anti-spam and anti-virus protection**
- **Secure Send** allows you to send files with complete confidence.
- **Audit Feature** helps achieve full HIPAA compliance by facilitating traceable file sharing and sending. As part of the e-mail auditing service, members can chose to receive a monthly CD with all incoming and outgoing transactions archived per audited account.
- **Instant Messenger** provides a fast and efficient communication platform that enables users to instantly communicate over the Internet.
- **File Cabinet** application provides users with file storage and sharing capabilities without having to purchase a file server. The file application combines security with fast and easy file transfer to maximize workflow from any location.
- **Online Calendar** system allows users to manage and maintain schedules and provides the option to share and schedule with others.
- **Task Manager** helps you maximize your time with a personal task tool.
- **Direct Connect for Outlook** synchronizes MaxMail™ accounts with Microsoft Outlook.
